

## Call for data

20.07.2020

Discuss Data ([www.discuss-data.net](http://www.discuss-data.net)) is a new **open repository for storing, sharing and discussing research data** with a **focus on the post-Soviet region**. Launched in September 2020, Discuss Data is funded by the [German Research Foundation](#) (DFG) and operated by the [Research Centre for East European Studies at the University of Bremen](#) (FSO) and the [Göttingen State and University Library](#) (SUB).

Discuss Data goes beyond ordinary repositories and offers an **interactive online platform** for the discussion and quality assessment of research data. Our aim is to create a **space for academic communication** and for the **community-driven publication, curation, annotation and discussion** of research data on the post-Soviet region. Through assigned digital object identifiers (DOI), that serve as permalink, citation source, and assertion of authorship all in one, Discuss Data increases transparency, visibility, and accessibility of research data.

With this **call for data** we encourage scholars, research institutions, universities, and opinion research institutions, to submit their research data related to the post-Soviet space to Discuss Data. Data can be interdisciplinary, quantitative or qualitative, in text, excel, data or other formats (including pictures and videos), as long as copyrights and standards of good scientific practice are not violated.

Especially welcome are datasets on the following topics:

- **Protests and social movements**
- **Corruption and informality**
- **Social policy**
- **Economic history**
- **Public opinion research**
- **Economic data**

Data on other topics are eligible as well. For more information regarding data submission, please check [our guidelines](#) or contact [our curators](#).
